Notice of Additional Order of RS1

Digital Media Professionals Inc. acquired an additional order of RS1, image processing semiconductor for the amusement market as described below.

1. Details of the order

RS1 is the first in the pachinko/pachislot industry to integrate a real-time 3D engine and a high-performance, high-compression video engine on a single chip, which not only enables beautiful and realistic video expression required for next-generation entertainment, but also helps customers reduce the cost of pachinko/pachislot machine chassis.

The latest order amounts to 294 million yen on top of the large-scale order of 1,308 million yen disclosed on February 10, 2022 and 1,602 million yen in total will be delivered to customers from April 2022 onward.

2. Future outlook

This order is scheduled to be reflected in the consolidated financial results for the fiscal year ending March 31, 2023 and will have no impact on the consolidated financial results for the fiscal year ended March 31, 2022.

In the medium-term business plan announced on May 14, 2021, RS1 sales for the fiscal year ending March 31, 2023, were planned to be 1,500 million yen.

We will strive to expand our market share in the market segments where we can demonstrate the superiority of RS1, our unique 2D/3D integrated chip.
